

Get on Board! Join us for the **1,000 Walker Ski Challenge** and help local seniors ski to safety!

Tennis balls belong on the courts...

While their rubber core might seem like a good solution, tennis balls present safety hazards and compromise hygiene:

- Tennis balls' fibrous cover is contaminated by dirt & liquid
- Rubber core marks hardwood or tile floors and tears carpet
- Friction from the rubber can cause a sudden trip hazard
- An unsecured tennis ball can fall off at any time

Walker Skis: A safer, hygienic solution

Walker skis are engineered to gently glide over all surfaces – both inside and outside the home, without marking or scratching. They are manufactured from durable plastic and can be cleaned with disinfectant or soap & water. Walker skis eliminate skidding and are available in standard sizes, making installation a breeze.
